DETAILED ACTION

Applicants' arguments, filed 1/27/03, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

CHANGE OF INVENTORSHIP

It is acknowledged that the inventorship has been changed with papers as filed in this continuing application to delete Jeremy Fennelly, Roy E. Martin III and Mark Susser as inventors of the instant application.

TITLE

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The presently pending claims include both systems and methods whereas the present title only is directed to systems.

PRIOR ART

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 1631

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 9, 11-25, and 27-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drobish et al. (P/N 5,639,658).

This rejection is maintained and reiterated from the previous office action, mailed 8/13/02. Applicants argue that Drobish et al. fails to meet a third requirement for prima facie obviousness in failing to describe probes "arranged and constructed to detect biological cells and process chemicals". In response this limitation has not been found in claim 30 and thus is moot regarding claim 30. Further regarding claim 30, line 6, the "measuring an amount of said cells...for processing" was clearly pointed to in the previous office action, mailed 8/13/02, in the reference in column 7, lines 51-60. Turning to instant claim 9, the detection of biological cells and process chemicals therein lacks any limitation as to what is detected regarding these materials. Thus, the various sensors, referred to as probes, as admitted by applicants that are described in Drobish et al. fulfill the prima facie obvious requirement. No other arguments have been set forth as seen in applicants' REMARKS, filed 1/27/03. Consideration of specific instant claims reveals that applicants' argument regarding such claims are persuasive and these claims are no longer included as rejected hereunder.

Art Unit: 1631

CLAIM OBJECTIONS

Claim 30, line 9, is objected to because of the following informalities: The word "measure" in said line 9 of claim 30 seems awkwardly worded in context. "Measured" is suggested. Appropriate correction is required.

Claims 10, 26, and 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)).
